

# Success by Grandell

## Thank You!

I seriously injured my foot in May of 2009. I found out I needed an amputation, and, after my procedure, was referred to Grandell for rehab.

I had no idea what Rehab was before this experience, and the therapists and medical care I received at Grandell far exceeded my expectations.

Rehab at Grandell was enlightening and progressed my healing. They took care of all my needs, emotional and physical. When I started walking with my prosthesis, Grandell's rail/rehabilitation harness system took away my fear of falling and helped me progress quickly.

All the Rehab staff at Grandell were excellent at their job. I am walking as normally as I was before my amputation, and the therapy staff helped me progress to where I am very comfortable wearing my prosthesis. I believe that, if it wasn't for Grandell and their staff, I probably wouldn't be walking.

Thank you, Grandell for getting my life started again.

Sincerely,  
Charlie Tewes
